

CRIMSON PROJECTS

Crimson Projects partners forward-thinking companies with skilled students eager for professional experience. Internship projects tackle real company needs through mentored learning objectives.

Company Benefits

Companies gain early access to talent and valuable project deliverables with fresh innovation from some of the brightest minds soon to be entering the workforce. Company mentors are provided assistance in supervising student's work.

Student Benefits

Students get real-world experience with expert mentoring. Mentoring enables each student to learn as they work towards project deliverable objectives designed to extend their academic knowledge into practice.

Crimson Projects provides student teams with specified outcomes in the following disciplines:

- Data analytics & insights
- Data research
- Product management
- Software design & development

Participating companies include:

O.C.TANNER
