

BREWING

Presentation by Lucy Sorber
and Payton Crank

SUCCESS

COFFEE CART

DATA ANALASYS

COFFEE CART

EFFICIENCY: THE GOAL

- Serve students, faculty, and staff across campus
- Data indicates: best hours, menu success, revenue times
- Goal: Maximize sales, minimize wasted effort

EFFICIENCY: THE GOAL

TIMING

WHEN ARE STUDENTS MOST CAFFEINATED?

7 AM coffee outperforms any other hour

- Morning (7-11AM) = peak transactions & revenue
- 7:00AM = single busiest hour
- Tuesday = most active weekday
- Fall = highest revenue overall

FAVORITE DRINKS

01 Latte = #1 (8,023 transactions)

03 Hot drinks dominate cooler months; cold drinks rise in warm months

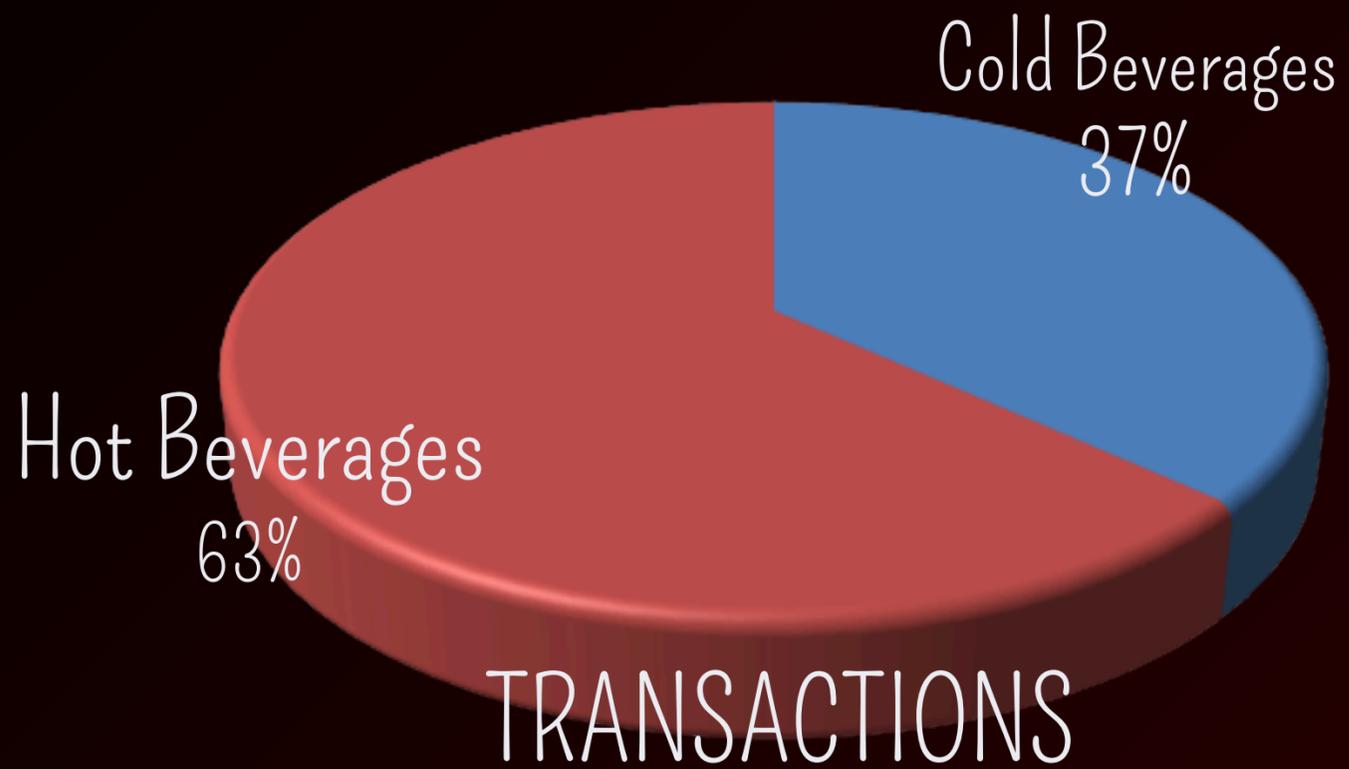

02 Hot drinks > Cold drinks overall

Suggestion:

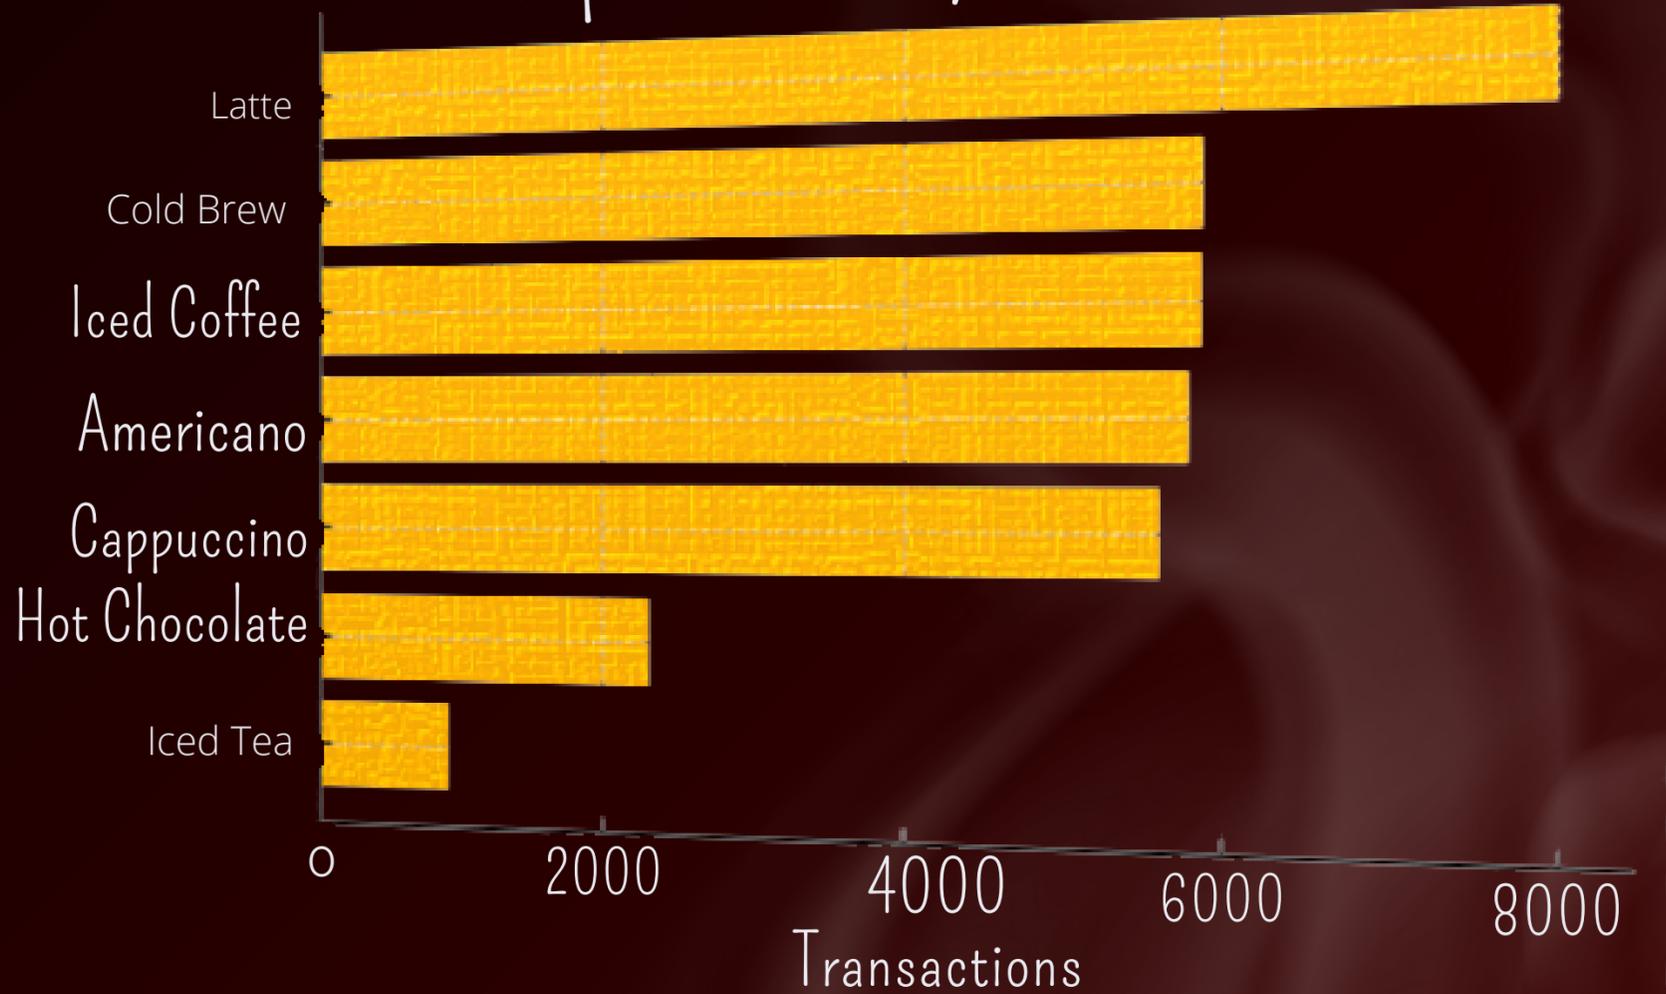

Rotate warm seasonal specials for colder months; rotate cold seasonal specials in summer to capture extra revenue

FAVORITE DRINKS

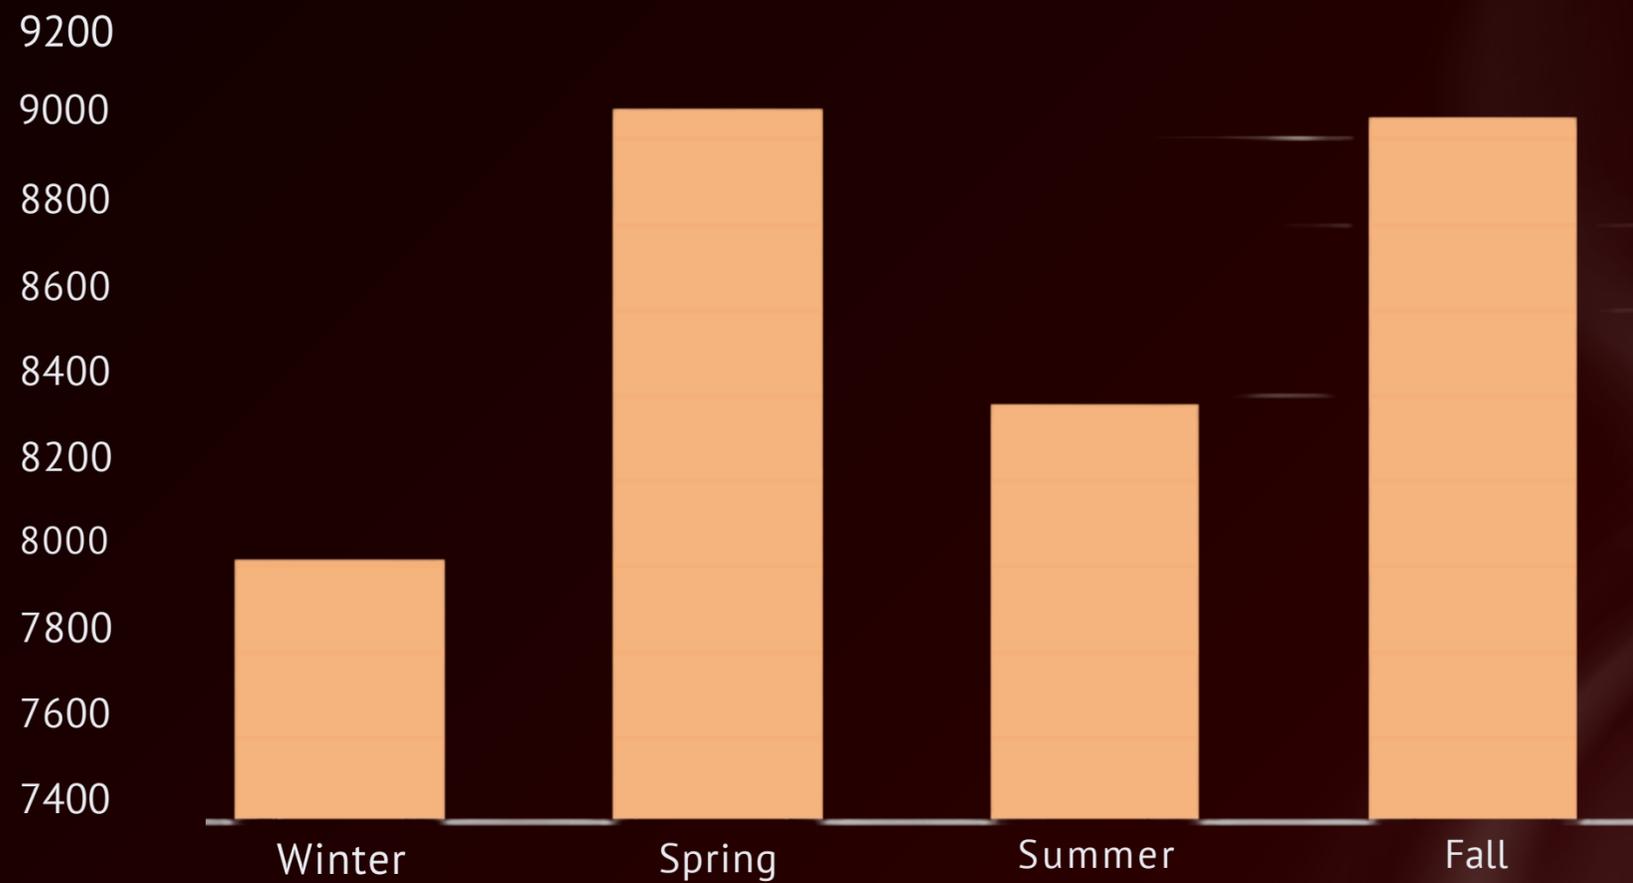

Top 8 Items by Transactions

FAVORITE DRINKS

transactions

CORRELATION:

weak, negative correlation:
warmer days have slightly
fewer transactions
($r = -0.13$, $p = 0.014$)

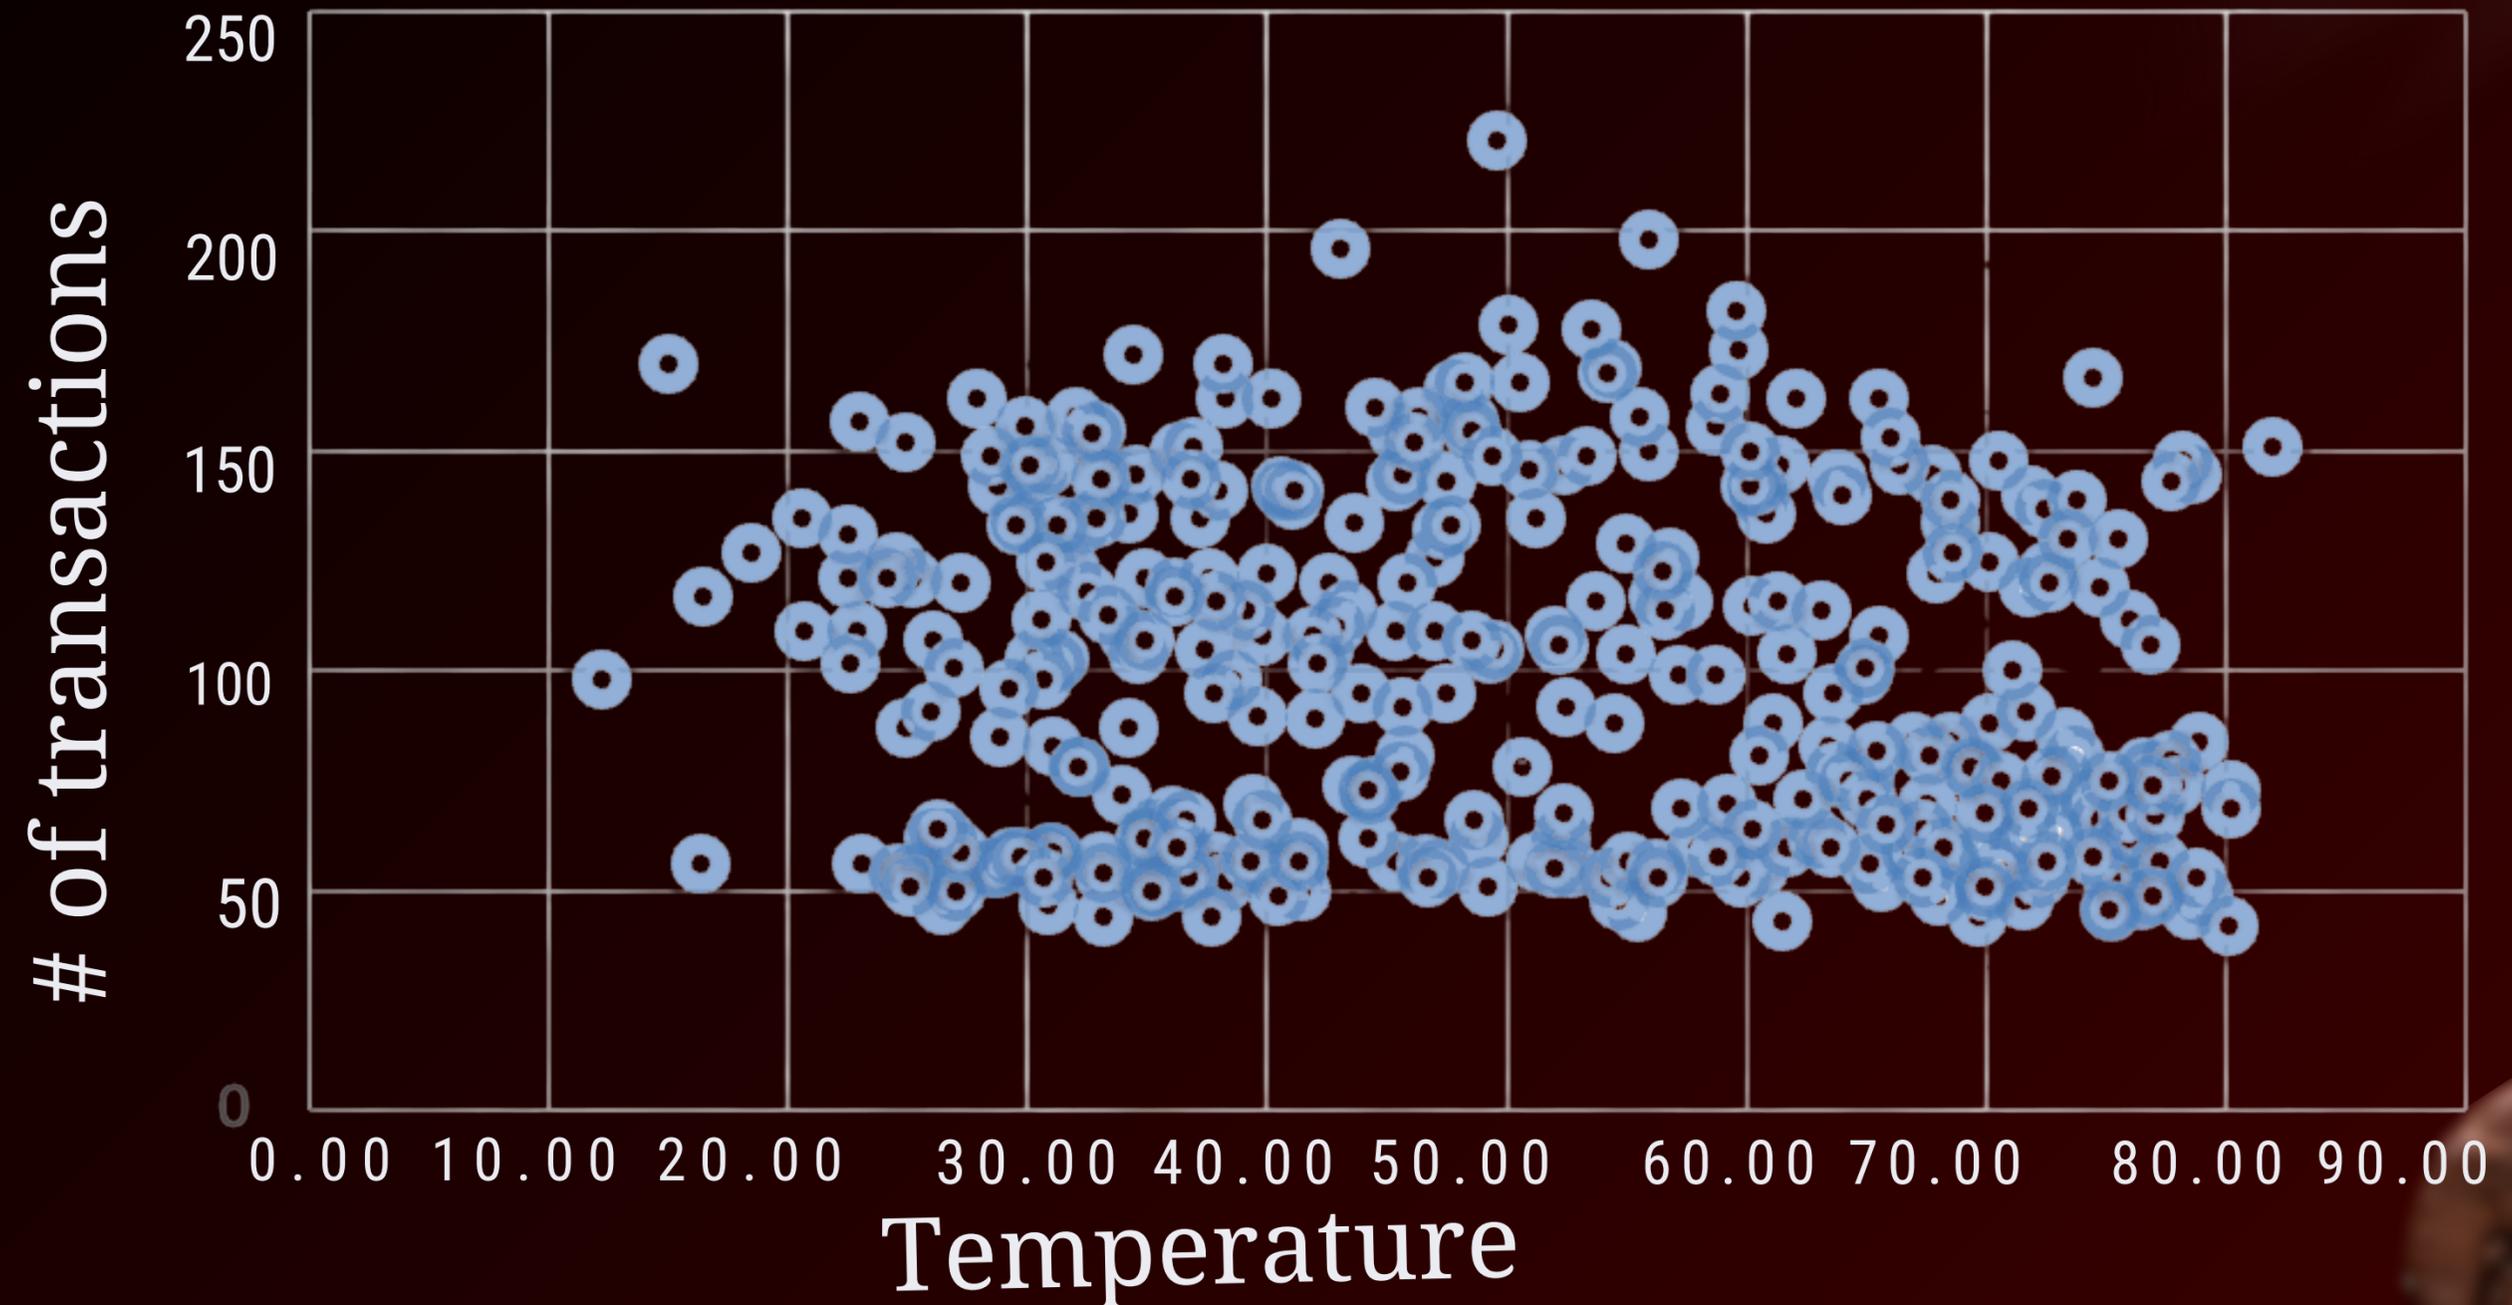

WEATHER VS. COFFEE

- Hot drinks are more popular on colder days
- Cold drinks in warmer months
- Weather explains only a small part of demand

WEATHER VS. COFFEE

Daily Transactions

PEOPLE = COFFEE

THE FINDINGS FROM THE DATA INDICATE:

Moderately strong positive correlation: $r = 0.78$, $p \approx 4.43e-288$

Correlation

More people nearby leads to more sales

Conclusion

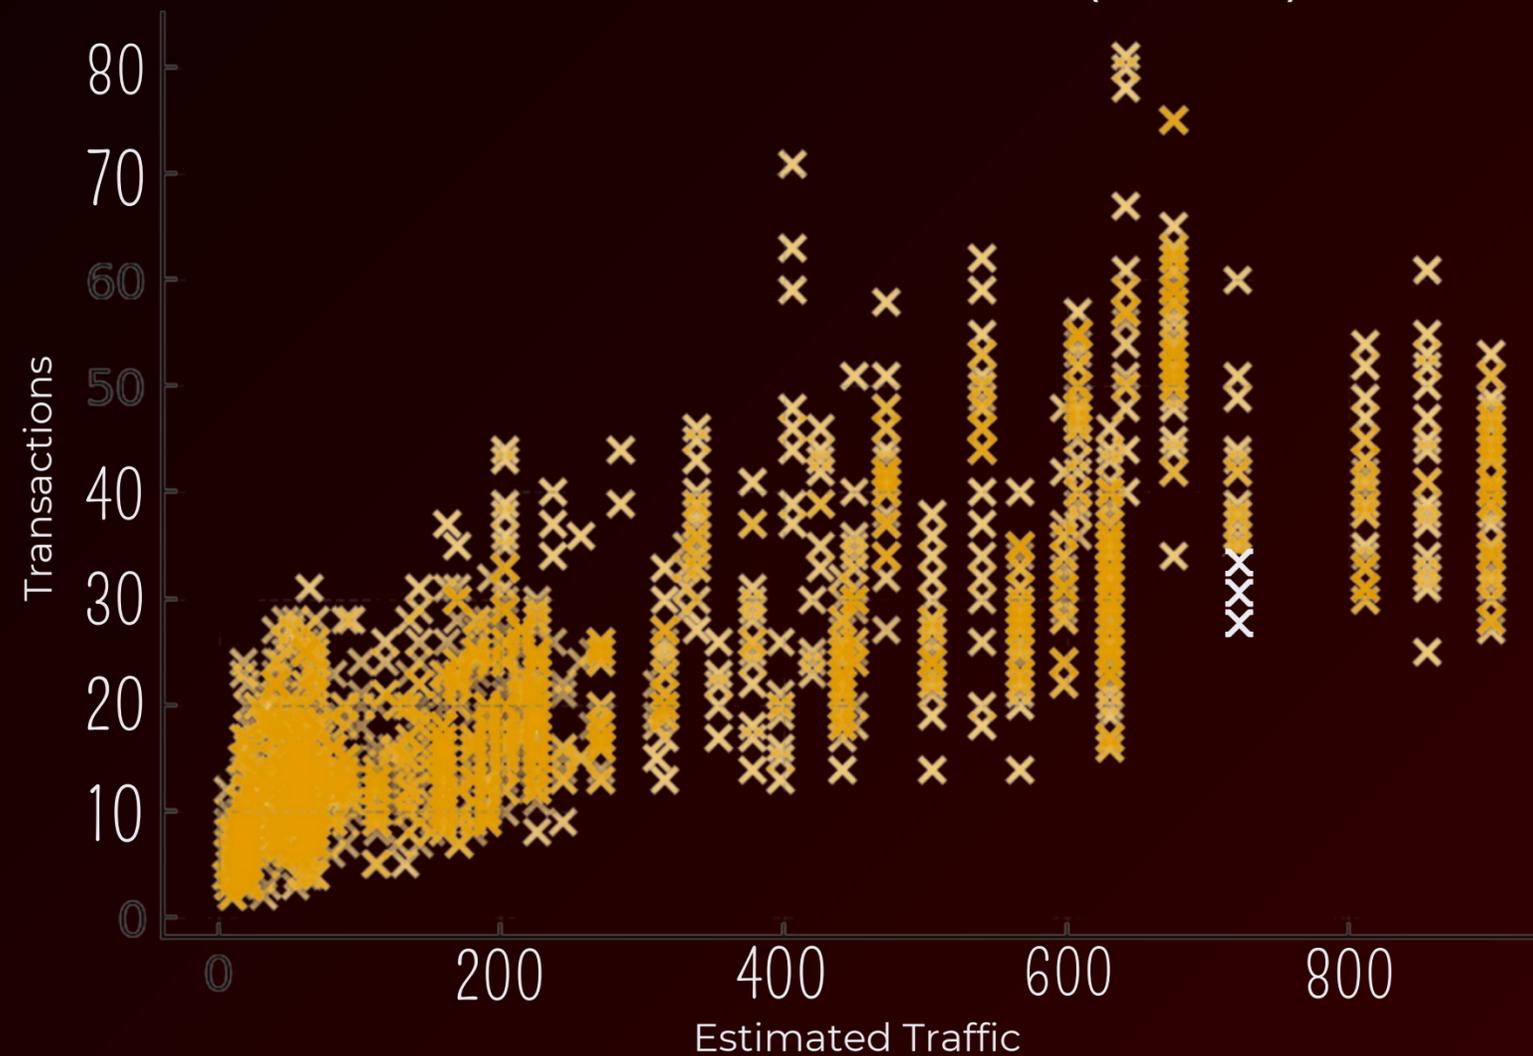

With the correlation, foot traffic is reliable predictor of revenue

Predictability

PEOPLE = COFFEE

THE DATA:

Traffic vs Transactions (r=0.78)

HOW TO OPERATE OPTIMALLY:

Optimized Time:

- Core hours: Morning (7-11) & Midday (11-2)

Staff adequately:

- Peak staffing: 7AM-11AM to accommodate high customer volume

MENU:

ESPRESSO
CAFFE AMERICANO
CAPPUCCINO
CAFFE LATTE
CAFFE MACCHIATO
LATTE MACCHIATO
CAFFE MOCHA
ICED CAFFE

Menu Focus:

- Menu focus: hot drinks in cold months
- cold drinks in warm months

Reduce Inefficiencies:

- Consider reducing hours on weekends and summer, only going when peak time and day is to minimize losses.

DAILY REVENUE ESTIMATE

HOW MUCH CAN WE MAKE ON AVERAGE?

- **Sample mean daily revenue:** \$426.43
- **95% confidence interval:** \$349.89 – \$502.96
- **Winter average:** \$458.59
- **Spring average:** \$463.84
- **Summer average:** \$430.47
- **Fall average:** \$498.88

***TIP! TRACK DAILY PERFORMANCE TO IDENTIFY SPECIAL OPPORTUNITY DAYS!**

SCENARIO:

IF LIMITED TO A 4- HOUR, MOST PRODUCTIVE WINDOW:

01	02	03	04
BEST TIME OF DAY:	AVERAGE TRANSACTIONS:	AVERAGE REVENUE:	TOTAL HISTORICAL REVENUE:
7AM-11AM	36.10	\$171.60	\$60,917.75

RECOMMENDATIONS:

- 
- Operate 7-11AM at full capacity, extend to 11-2PM if traffic continues
 - Hot drinks dominate fall/winter, and cold drinks dominate spring/summer
 - Staff allocation based on peak traffic (7-11AM)
 - Use daily & seasonal trends to plan menu and promotions
 - Consider adding special offers or loyalty program during slow periods

RECOMMENDATIONS

IDEAS TO INCORPORATE:

01

LOYALTY DISCOUNTS:

Card for repeat customers during morning rush with incentives

02

SEASONAL PROMOTIONS:

- Summer: "Iced Brew Wednesdays"
- Winter: "Hot Chocolate Fridays"

03

SMALL DATA EXPERIMENT:

Track which promotions increase slow-period sales and repeat successes

04

WEATHER SPECIALS:

Incorporate weather-triggered specials via app notifications

THANK YOU
